Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-32, drawn to a cleaning compound/kit, classified in class 510, subclass

375.

II. Claims 33-36, drawn to a method of cleaning a surface in a food processing

environment, classified in class 134, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be

shown to be distinct if either or both of the following can be shown: (1) the process for using the

product as claimed can be practiced with another materially different product or (2) the product

as claimed can be used in a materially different process of using that product (MPEP

§ 806.05(h)). In the instant case the process for using the product as claimed can be practiced

with another materially different product such as a cleaner comprising sodium alpha olefin

sulfonate, sodium hydroxide and sodium silicate.

3. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.
